AGROFORESTRY TOOL

Introduction

This tool is for collecting general and specific data on the agroforestry intervention by ESFROMA on smallholder family farms in the Rwenzori region. The data will be used to inform better management of the intervention and also to inform future agroforestry interventions. The data will mainly be collected by a voluntary team who will regularly conduct follow up monitoring on the agroforestry intervention. During the first three months of tree establishment, monthly visits are recommended after which visits should be made at least every end of 3 months.

1. Name of FFLG:
2. Name of household representative:
3. Sex:
4. Age:
5. Household contact:
6. Record of all people in this household

Name									
Age									
Sex									

7. Location of garden where trees are grown (Village, Subcounty):

8. Altitude:
9. GPS coordinate:
10. General description of the farm (Land size, soil type, crops on the farm, livestock):

AGROFORESTRY TOOL

Note: Update on each day of follow up visit

11.

Type of trees	No. planted	Total number of trees on the farm per type	Date planted	Location where planted (e.g boundary, in coffee garden etc)	Purpose for which tree is planted

12.

Date of visit	Type of trees	No. surviving of planted trees	Number of trees damaged	Cause of damage	Action to abate the damage	when to abate the damage	Who is responsible to abate the damage

AGROFORESTRY TOOL

13.

Date	Type of tree	Average height	Canopy size	Positive results realized so far (livestock feed, firewood fruits, microclimate regulation, soil conservation etc)	Negative impact	What to do to overcome negative impact

14.

Activities to do soon	When exactly to do the activities	Who to do activities	When can we do follow up monitoring on these activities?

AGROFORESTRY TOOL

15. Transition on the farm in pictures?

a. Map of the farm showing interaction of elements at the beginning of the intervention

b. Map of the farm after one year of the agroforestry intervention

c. Map of the farm after two years of the agroforestry intervention

d. Map of the farm after three years of the agroforestry intervention

e. Photo at beginning (Date taken……………………………..…………..)

f. Photo after one month of intervention (Date taken………………………………………..)

g. Photo after two months of intervention (Date taken………………………………..………)

h. Photo after three months of intervention (Date taken………………………………..………….)

i.   Photo after…………………………..….months of intervention (Date taken……………………….…………..) etc

16. Success story?

a.   *Date and description of the farmer who narrates the story:*

b.   *Content of the story:*
